

Nature Friendly Products' hot cups and containers are designed to meet the requirements of the food service industry and protect the environment. These products are fully compostable and biodegradable in approximately 50-100 days in properly maintained compost facilities. The paper hot cups lining is made from a polylactic acid (PLA) renewable resource. Superior in strength and performance, suitable for hot/cold food and beverages, microwavable and refrigerator safe, impermeable and non toxic.

Item #	Description	Sleeve count	Case Weight (lbs.)	Units per case	Pallet Ti/High	Case Qty per pallet
CUPS						
SMRE-4	4 oz. Hot Cup	50	9.1	1000
